

Digital Download

A Digital Download of your production is of much higher quality than a DVD and gives you more options for playing, archiving and sharing.

- 1) A link has been sent to you of your production via email or text. You'll need to make sure you have enough storage space for the download on your device.
- 2) Click on the link to download your production. You'll need to forward to your email from a text to download to a Desktop-Laptop Computer.
- 3) Download of your production will take time depending on the file size.
- 4) Download to your Smartphone to view and/or cast the production to a TV.
- 5) Once downloaded to your Laptop-Desktop Computer you can save to any digital device (Thumb drive/External Hard drive - format to NTFS) and/or burn to a DVD using any free DVD burning software if you wish.
- 6) Thumb drive of the mp4 file will play on most Smart TV's by inserting it in the USB input on the back/side of the TV set or Roku device.
- *7) Link will be available to download until January 31st, 2024 so be sure to download by then for future viewing.
- 8) Archive your Productions and Enjoy!
